Executive Summary

Defining the Metaverse can be challenging as it can encompass any thing we currently do online, but in a simulated 3D digital environment, taking advantage of the digital connectivity we have rapidly developed in the last century.

The Metaverse will combine online experiences in a fluid and connected way that more accurately reflects the human experience. To do this, we will use tools in the technical world to represent, and improve upon, what we encounter and experience in the physical world. Immense virtual worlds, augmented reality, virtual reality, and the internet will be used as a shared virtual 3D space connecting to all the social, gaming, shopping, research, education, and financial programs we use - all interconnected and interacting in a digital ecosystem.

The Metaverse will be the hub of it all, a universe in itself. The platform includes a games store to download and play games and a gaming collectible NFT marketplace integrated with games.

What makes us different

Zmax will be used as the medium of exchange within the Metaverse. It will be used to buy, sell, trade, and modify in-game assets. In addition, Zmax will be used as points of entry for various areas of the Metaverse, for accessing games, virtual concerts and clubs, media, entertainment, education, modes of travel in the Metaverse, investing invirtual real estate, mining for material sin-game, paying other players for services, social experiences and programs, and really anything else that a currency can be used for in the physical world, but virtual. It is a digital currency for the virtual world.

While the ZMAX Metaverse is an interactive 3D universe based in space, with the freedom to explore different virtual worlds and communities, it is not necessarily a game in and of itself. It can instead best be described as a hub for virtual social interaction and expression, and trading and collecting assets within a digital economy .

Our Mission

ZMAX combines the gaming and blockchain in its most superior way and wishes to develop a passive economy to the project. We believe in the future of Blockchain and Metaverse in the gaming world and there is an opportunity now to build good reliable products and a strong economy from gaming.

At the same time we want to create value for our token holders and provide them an identity in this revolutionary gaming world. Inline with the roadmap we will have active gamers, developers, content creators to fuel the ZMAX Metaverse.

We aim to bring all the game enthusiasts, players and developers at one panel to build, explore games of all categories on Web3 & Metaverse. The panel is also intended to generate a common sharing economy for all the active participants.

Our Vision

ZMAX Metaverses are a relatively new concept and technology, and there are very few currently that exist beyond the research phase. None are fully developed, and most are notably underdeveloped. All of them are centralized and controlled by companies or projects with a problematic consolidation of power.

The Zmax Metaverse is currently the only truly decentralized Metaverse project, and it is seeking to merge the concept of the ZMAX Metaverse with a cryptocurrency based economy. It is based in a space- themed setting for an enhanced experience that taps into what makes humans unique; a drive and desire to explore, learn, and go beyond.

All games will be connected and accessible through the Market in the 'Play' section, which links directly to the Metaverse. The user's statistics and actions can affect the environment, other users, and economy in various ways. Gameplay can affect the Metaverse, and the Metaverse can affect gameplay. Every thing is connected.

A Note From The Founder

Thomas Harvey

Founder
ZMAX NET CORPORATIONS

Welcome and thank you for considering joining ZMAX NET CORPORATION on this exciting journey!

For startup veterans like us, operating in the crypto space is a breath of fresh air. It allows you to focus on creation and development without bureaucracy or politics.

We've all seen the incredible growth of decentralized finance (DeFi) in 2026 and 2026 and could experience first hand the speed at which new solutions emerge when the incentive is right. In crypto, projects that would take years to launch can be built and released within months.

Taking a proven next- generation technology and bringing it to market via a token-powered ecosystem allows us to reach audiences, investors, supporters, users, and fans who normally would not be able to join our vision, let alone help build it.

We want to empower our users to find new ways to leverage our tech in their personal and professional lives as artists, gamers, influencers, marketers, collectors, investors, or businesses and entrepreneurs.

What distinguishes us from other projects is our 10+ years of experience as a team, building and solving complex problems at scale. Most of our team comes the most successful startups in the advertising technology space of the past decade.

We bring the know-how, strategic partnerships, and

relentless energy to make any project areality.

We have the funds and the experience;

Professional team and partners;

Tech and the vision.

All that is left is for you to join us as we embark

on the journey of making ZMAX

the next biggest thing in crypto.

ZMAX Business Model

The ZMAX NET project aims to encompass several major markets. Some markets and target audiences that already expressed interest in our technology include:

1. Gamers
2. Artists
3. Celebrities & influencers
4. Marketing professionals
5. Professional athletes
6. Online fashion platforms

With the ongoing developments in technology, the Blockchain and Metaverse is Attracting more users towards going online for gaming and entertainment. ZMAX's business model is based on a diverse gaming service and multiple use Cases of our token.

Games :

The Primary Revenue of ZMAX will come from deploying games and Leveraging Game Infinity owned NFT's.

NFT's :

We will create and listin-game NFT elements, characters, lands and arts. These NFT's are backed with a value and adds revenue to the creator on every trade.

Token Use Cases:

When ZMAX members utilize the tokens on playing games and trading NFT's. Every single transaction on the network will make use of native token.

Holders & traders:

With the rise in holders and more use cases the evaluation of The project will also grow.

The ZMAX Metaverse

ZMAX is working to present an ecosystem of gaming and NFT with Blockchain and Metaverse, a combined mechanism of AI, VR and AR which is also the future.

Blockchain/ Web3 gaming VR /AR Gaming :

The ZMAX Metaverse Game Infinity is working to present an ecosystem of gaming and NFT with Blockchain and Metaverse, a combined mechanism of AI, VR and AR which is also the future. Users can play single player and multiplayer games on web3 (Online games) which is connected to a wallet and makes instant reward payments. All these games can be played from the Polygon Explorer and players can use the META tokens to participate, winners get rewards directly to their wallets. ZMAX will also launch multi-player web3 games that allow multiple users to connect with each other and play.

Gaming with VR and AR:

It is also a part of ZMAX, our team is in collaboration with resources who will help us achieve this and present this to our users in a bigger way. Virtual reality and augmented reality are much anticipated terms from along time but the existence of them in the real world is limited. VR & AR applications are most commonly used in gaming, but now as the focus grows, more applications are taken into consideration. Social media, ecommerce sites and mobile apps have started using VR and AR to simplify and modernize their services.

Economical Approach:

ZMAX economy is designed to be balanced with necessary backup and retention in all dimensions. We want to make the holders feel safe about their holdings and continue using the network with the same confidence. Reserving 30% of Liquidity for 4 years span when the listing phase begins Backing up NFT's with GAMEIN and ZMAX reserve 100% of token will be into existence unless the necessary burning is required Arbitrage yielding of funds Invest in futuristic gaming projects Regular accounting, audits and reporting also involved.

Fund Raising:

ZMAX needs to secure around $1 Million to undertake all the operations to develop and run top most Metaverse and web3 gaming products. The Gaming NFT's on the other hand will pay a very important role in reserving the token value and thus the team can focus on development without we are also inviting potential investors to participate in the Private sale through the whitelist program.

Metaverse and Blockchain

The utilization of blockchain adds other dimensions to the Metaverse saga:

1. It makes 3D objects stored on blockchain virtually indestructible and eternal. The decentralized character of the blockchain with its copies stored on millions of private machines around the world means there will always be a copy of the NFT somewhere. Blockchain is more resilient than cloud or server data centers.

2. It offers intrinsic economies and new sources of revenue. NFTs (non-fungible tokens) are not only certificates of ownership and authentication of digital art and collectibles. They are also smart contracts that allow their creators to collect royalties from the future usage of their avatars, art, or other 3D models. By introducing the ZOHOMAX, we are creating a complete settlement ecosystem and a new Metaverse-centric economy.

ZOHOMAX (ZMAX)

Zohomax is a bilateral model that connects Gaming and Blockchain both in potential
Business approaches

The total Blockchain gaming market reached $190 billion and expected to hit $250 By 2023 NFT sales in Oct 2021 surged to $10.7 billion Crypto wallet holders Crossed 70M activer wallets DeFi tokens have reached $35 billion in TVL The Global gaming industry is now worth $200 billion and expected to hit $314 billion By 2026 Metaverse and the Blockchain are a strong and reliable platforms to take Gaming to the next level.

Project Role:

The ZMAX's aims to maximize the value of both gaming and NFT marketplace Platforms. The project ultimately targets to provide token holders with authority to Vote and explore features.

1. Building a global community of play-to-earn gamers who play competitively to Collect in- game rewards.
2. Reserve high yielding assets (games, crypto & NFT's) for the organization to Generate a network based earning.
3. Allow the community to participate in the project developments via voting and Proposals.
4. Coordinating with gamers and developers to work on Metaverse games and Minting NFTs.

How it works

3D NFTs ----------
Scanning artwork into 3D NFTs will be done in a similar fashion where usage time with our metascanner will be paid for using our native ZOHOMAX alternatively paying per scanned item.

We are developing a mobile meta scanner that will frequently travel around the world to various locations where we secure deals with artists, museums, and galleries. Just imagine being able to pay a small sum of ZOHOMAX to view a virtual art gallery in the comfort of your own home.

Team focus:

The ZMAX team will work on the following:

Acquire new players, streamers, ambassadors, community managers, and game masters Incentivize participants through reward program, events, tournaments, and voting participation; Distribute token grants; Build new ZMAX features; Build technology to expand its core activities of Gaming and NFT ; Purchase virtual gaming assets.

Professionally Designed and Developed on Unreal Engine:

The professionally developed aspect of the Metaverse will continue on Unreal Engine and is an adaptation of Lord Digital World (LDW) are the technical partner of the revolution. Providing more than 8 years of R&D on the physical gateway to the Metaverse. LDW aims to capture every detail of the physical world and port it into the digital world. As the technology arm of the project LDW provides all technical aspects of the project for hardware and software.

LDW is a near-complete AAA space exploration, action, adventure, and massively multiplayer online (MMO) game that will be transformed and adapted into the ZMAX Metaverse. It will focus on space travel and mechanics, space base connections, asteroids and mining, planets, space battles, and a complex and interesting virtual gaming economy.

ZMAX has on boarded a game design and development team with two decades of MMO game development experience and expertise crafting in-game economies. The economy will utilize the STARL token and play a prominent role across all aspects of the Metaverse, with decisions and actions affecting various elements.

The game development here will implement mechanics that will be utilized across the entire Metaverse. Space flight will be the primary method of travel in the Metaverse. While the gaming side will focus on missions, the rest of the Metaverse will have the option for users to explore, collect assets, mine asteroids, trade in the ZMAX Market, and interact with others. The Unity progress and development will merge into the Unreal version, which will be the main engine used as development continues.

Economy and Play-To-Earn:

The concept of play-to-earn is quickly growing in popularity. This is significantly Enhanced in places where finding access to paid work may be difficult or for people In challenging personal circumstances where opportunities are lacking. While the Play-to-earn mechanism is used in several gaming projects, unfortunately, many have also abused it.

We will ensure fair, balanced, and secure mechanisms in Gameplay and travel in the Metaverse to avoid this. Users will have abilities to play and earn various assets that are valuable in quests and to progress further in-game.

These assets will be earned by playing and completing missions or battles while Traveling between spaceships and hubs in the Metaverse. Users can either use these Assets to progress in missions and games or sell them to others for profit on the ZMAX Market. Assets earned can be common and valuable materials, fuel, tools, Or weapons, or rare assets that are hard to find and highly sought after on the market.

We also aim to provide a vibrant virtual economy with ways to earn and trade. As we believe in community input, we will steer the direction of the project according to what the community thinks are fair and balanced ways to trade and interact in the virtual world, while also creating a fun and adventure-filled Metaverse to explore.

For example, specific items and components might only be available to craft in particular locations in the Metaverse. You could find that demand for features and raw resources is higher at one base or space station, while the demand for finished goods is higher at another.

Both users and AI can generate missions to deliver the required products to appropriate locations.Other tasks may require users to extract minerals, deliver miscellaneous goods, and much more, contributing to a dynamic economic system based on primary supply and demand.

If missions are accepted but fail due to pirate activity or attack, then subsequent tasks will be implemented to combat the pirates in those areas. Thus, users will not only participate in the Metaverse, but they will have a part in shaping, affecting, and responding to it.

ROADMAP

Q1 2026

- Setup up legal entity
- $10M seed funding from Thomas Harvey
- Market research
- R&D confirming the feasibility of the project
- Validating business model
- Testing 3D scanning technology
- Securing strategic partners & advisors
- Creating proprietary smart contract architecture
- Core team formation
- Creating marketing strategy
- Establishing 5 year plan & vision
- Premium brand creation

Q2 2026

- Initial talks with high-profile investors
- Stress test smart contracts
- Expand core team
- Verify ZMAX METAVERSE locations
- ZMAX METAVERSE development
- Website VI
- YouTube channel rebranding
- Awareness marketing & PR campaigns
- Private presale
- Public presale registration
- AMA with Thomas Harvey
- Pre-launch marketing campaigns
- Opening whitelist audit

ROADMAP

Q3 2026

- Public Launch on Pancake swap v2
- ZOHOMAX release
- Post launch marketing campaigns
- ZMAX Metaverse release
- First delivery of ZMAX METAVERSE chamber
- Initiate negotiations with CEXs
- Implementation of community voting
- Negotiations with onramp partners
- ZOHOMAX added to major rating websites
- Launch ZMAX podcast
- Announce artist partnerships
- Listing on first CEX

Q4 2026

- Expanding team
- Website v2
- Sponsorship of crypto & gaming events
- Explore game studio/developer partnerships
- Join prestigious global business organizations
- Onboarding strategic investors
- Growing international ZMAX communities
- Official ZMAX METAVERSE chamber
- ZMAX 3D NFT marketplace
- Further CEX listings
- Implementation of fiat to ZMAX onramp

Q1 2027

- Launch ZMAX METAVERSE 3D franchise
- Further ZMAX METAVERSE 3D chamber locations
- Blockchain meetups
- Gaming conferences & expositions
- Expanding team
- Expanding global presence & awareness
- Adding multi-language support
- Strategic gaming & crypto partnerships
- ZMAX Visa partnership
- Publish 10-year plan to scale to 100M users
